### Public-Policy Stance and Contributions

Item	Celsia's Stance	Description of the Commitment	Value of the Contribution in 2019 (COP)
Promotion of Regulations for the Incorporation of Renewable Energies	Support	<p>We are an innovative company that is committed to sustainability. Therefore, we support the incorporation of new and cleaner technologies in different sectors of the economy, as well as changes in the structure of the electricity sector to facilitate responsible, profitable and equitable competition practices for all.</p> <p>Through the professional groups in the sector, we participate in the discussion of the correct definition of the conditions of the long-term auction and the reliability- charge auction, as well as the connection conditions for small-scale self-generation and distributed generation projects, so that generation companies can develop new energy projects specifically based on wind and solar resources, and maintain competition, neutrality and voluntary participation in demand as essential pillars of the energy market.</p>	896,360,362
Regulation of Energy Purchases Destined for the Regulated Market (CREG Resolution 130-2019)	Support	<p>Our management before the authorities of the energy sector of each country where we are present, directly and through the guilds, is aimed at promoting technical proposals that positively contribute to the work of regulators to strengthen the regulatory frameworks of the energy markets, increase their efficiency and competitiveness and adequately incorporate the latest technological trends.</p> <p>CREG Resolution 130 of 2019 defines the principles, behaviors and procedures when entering into energy contracts, aimed at the regulated market in Colombia. In addition, we presented comments and proposals on the draft of CREG Resolution 079 of 2019, which approved the general formulas that allow electricity marketers to establish the costs of providing the service to regulated users and the corresponding rates in the National Interconnected System of Colombia.</p>	276,911,942

## Guild Contributions

Name of the Organization	Type of Organization	The Organization's Mission	Value of the Contribution in 2019 (COP)
The Colombian Association of Energy Generators (ACOLGEN, in Spanish)	Guild	ACOLGEN is a private, non-profit, non-political organization, created with the aim of promoting free and healthy competition and the sustainable and efficient development of the Colombian electricity market, in particular from the electricity-generation activity.	466,775,697
The National Association of Generating Companies (ANDEG, in Spanish)	Guild	ANDEG is a private, non-profit organization in which 14 electric-power-generating companies located in Colombia congregate, seeking to propose and promote measures that help National Government entities related to the energy sector and the environmental sector, as is the case of the Ministry of Mines and Energy, the Regulation Commission, the Ministry of Environment and Sustainable Development, as well as the Control and Surveillance entities, in the development and deepening of the energy market of the country.	272,031,665
The National Association of Domiciliary Public-Utility Companies (ANDESCO, in Spanish)	Guild	ANDESCO is a non-profit guild association that represents the interests of affiliated companies of home public utilities and communications, through participation in the construction of public policies, the promotion of best practices and the generation of information of interest that helps the sustainable growth of the sector and reduces social gaps, promoting care for the environment.	157,553,000
